

BASELOAD FOR ELECTRICITY

Giving you

Managed Flexibility

For the engaged energy manager who wants a level of security

How it works

Lock down the price of the bulk of your forecast energy consumption ahead of each month.

The remainder of your consumption will be priced at an index rate up to an agreed limit.

Benefits

Allows you to purchase energy ahead of when you want it.

Lets you trade flexibly while giving some protection from market fluctuations.

“

I want to manage how my company buys energy but I don't have the time to be watching the markets 24-7

”

Key Features at a glance

- + Set your price at a monthly level by trading for the bulk of your consumption ahead of time
- + Make purchases in months, quarters or seasons based on an agreed consumption profile
- + We will hedge any remaining volume up to a pre-agreed level on an index price if you have not traded your full requirement before delivery
- + Protection from within day price volatility on your final price

Non-commodity charging options

Non-commodity costs (Non CoE) are the obligatory charges in your price that are not for the electricity itself. This includes elements such as transportation and metering.

Choose from:

- + Straight pass-through of charges as they are received from third parties
- + Fix your charges each year as your term progresses

BASELOAD FOR ELECTRICITY

COMMODITY COSTS

The Standard Baseload product centres around the concept of Agreed Baseload Volume (ABV). This is the agreed maximum amount that you can purchase in forward trades. If there is a difference between forward-traded level and the ABV level, this is then settled on an index price ahead of the month of delivery (balancing trade).

$$\begin{aligned}
 &\text{Balancing Trade Price} \\
 &\quad \text{(Index)} \\
 &+ \\
 &\text{Forward Price} \\
 &\quad \text{(Live)} \\
 &= \\
 &\text{Cost of} \\
 &\text{Electricity} \\
 &\quad \text{(Average)}
 \end{aligned}$$

The Cost of Electricity is then applied to the whole of your actual consumption, and you are protected from volatile within-month market fluctuations, as long as your consumption stays within a set band.

Why Total?

In addition to being one of the UK's largest energy suppliers and the most transparent in terms of pricing*, we offer a range of valuable services, including:

GREEN ENERGY
Choose Green to ensure your energy comes from 100% renewable UK sources

MARKET REPORTS
Up-to-the-minute info on market conditions

POSITION REPORTS
Detailing your locked in energy volume versus what you still have to purchase for your profile

EV CHARGING
Future-proof your EV charging requirements with our world-leading networked technology

*According to our Energy Transparency Study, conducted by PwC, May 2016
