

FIXED FLEXI FOR ELECTRICITY

Giving you

**The best of
both worlds**

Enjoy the rewards of flexibility while having price certainty

How it works

Lock down the price of the bulk of your forecast energy consumption ahead of each year.

We'll give you a fixed weighted average price for your consumption for that year.

Benefits

Take advantage of flexible trading to secure your price.

Know what you're paying for the year ahead.

“

I want to manage how my company buys energy but also want some budget certainty

”

Key Features at a glance

- + Have the security and certainty of a fixed price each year but be able to build that price up with flexible purchases ahead of time
- + Make purchases in months, quarters or seasons ahead of each year of delivery based on an agreed consumption profile
- + We will hedge any remaining volume up to a pre-agreed level on an index price if you have not traded your full requirement before delivery

Non-commodity charging options

Non-commodity costs (Non CoE) are the obligatory charges in your price that are not for the electricity itself. This includes elements such as transportation and metering.

- + Fix your charges each year as your term progresses

FIXED FLEXI FOR ELECTRICITY

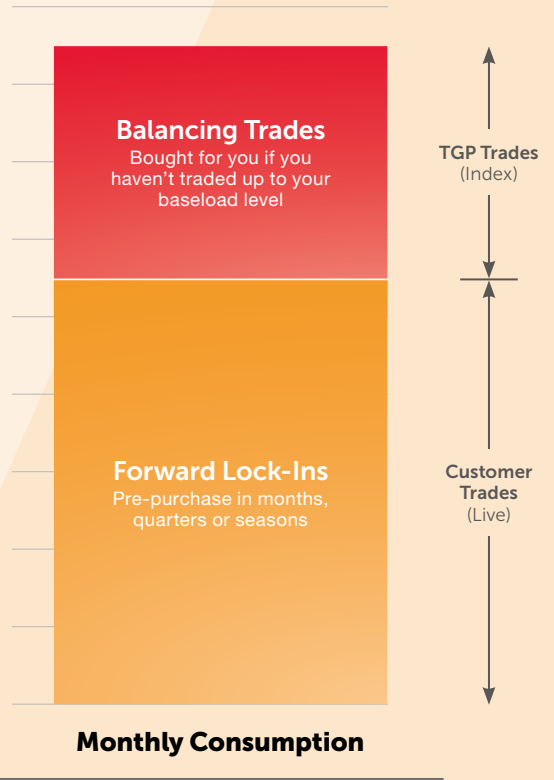

COMMODITY COSTS

The Fixed Flexi product centres around the concept of Agreed Baseload Volume (ABV). This is the agreed maximum amount that you can purchase in forward trades. The difference between the lock-in level and ABV level is then settled on an index price (balancing trade).

$$\begin{aligned}
 &\text{Balancing Trade Price} \\
 &\quad \text{(Index)} \\
 &+ \\
 &\text{Forward Price} \\
 &\quad \text{(Live)} \\
 &= \\
 &\text{Cost of} \\
 &\text{Electricity} \\
 &\quad \text{(Average)}
 \end{aligned}$$

All trades for a year are combined to give a single weighted average price applied for that 12 months. This is then repeated for each year of the contract as that year starts.

The Cost of Electricity is then applied to the whole of your actual consumption for the year, and you are protected from fluctuations within the year.

Why Total?

In addition to being one of the UK's largest energy suppliers and the most transparent in terms of pricing*, we offer a range of valuable services, including:

GREEN ENERGY
Choose Green to ensure your energy comes from 100% renewable UK sources

MARKET REPORTS
Up-to-the-minute info on market conditions

POSITION REPORTS
Detailing your locked in energy volume versus what you still have to purchase for your profile

EV CHARGING
Future-proof your EV charging requirements with our world-leading networked technology

*According to our Energy Transparency Study, conducted by PwC, May 2016
