

FULLY TRADED FOR ELECTRICITY

Giving you

**Total
Control**

The flexible electricity product for the energy expert

How it works

Control your energy purchasing according to your business needs.

Trade up to the day of delivery. You're free to get the best deals on the market.

Benefits

Highest market risk means the greatest potential to save.

Allows you to capitalise on your knowledge of the energy market and your energy needs.

“

I know my company's energy needs inside out and I can save thousands by investing time in securing the best prices.

”

Key Features at a glance

- + Having a good grasp of your expected usage, you can freely trade for the best prices for the energy you require
- + Make purchases in HHs, days, weeks, months, quarters or seasons
- + Freely buy for your needs up until the day before delivery of the energy
- + Any volume you use that is not pre-purchased will be priced at an agreed index rate
- + Manage your trades and position through our online platform

Non-commodity charging options

Non-commodity costs (Non CoE) are the obligatory charges in your price that are not for the electricity itself. This includes elements such as transportation and metering.

- + Straight pass-through of charges as they are received from third parties

OPEN FOR BUSINESSES

FULLY TRADED FOR ELECTRICITY

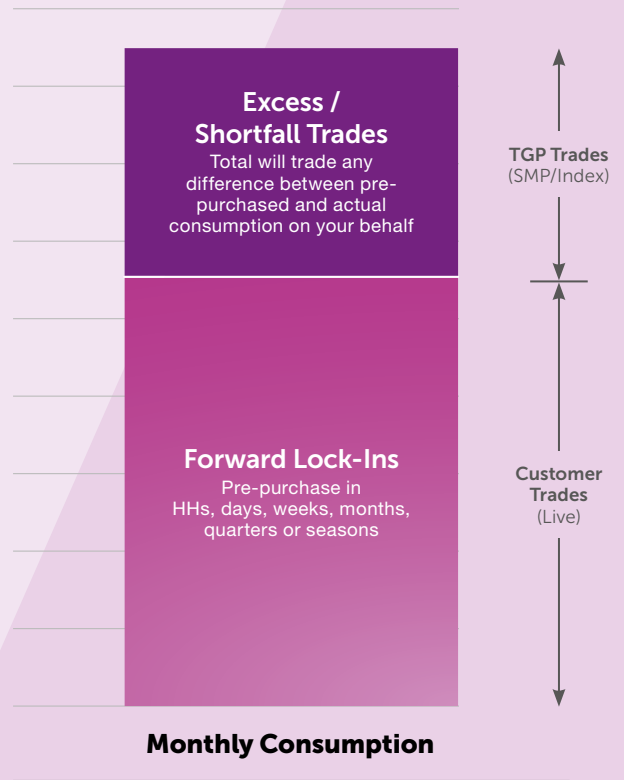

COMMODITY COSTS

You can make forward trades freely up to the day before delivery. Any difference in volume between forward traded level and actual consumption is settled on the within day market (SMP) or on an agreed index price (excess/shortfall trade).

$$\begin{array}{c}
 \text{Excess / Shortfall Price} \\
 \text{(SMP/Index)} \\
 + \\
 \text{Forward Price} \\
 \text{(Live)} \\
 = \\
 \text{Cost of Electricity} \\
 \text{(Average)}
 \end{array}$$

The Cost of Electricity is then applied to the whole of the actual volume.

In order to trade Days/HHs you must have access to the online platform.

Why Total?

In addition to being one of the UK's largest energy suppliers and the most transparent in terms of pricing*, we offer a range of valuable services, including:

GREEN ENERGY
Choose Green to ensure your energy comes from 100% renewable UK sources

MARKET REPORTS
Up-to-the-minute info on market conditions

POSITION REPORTS
Detailing your locked in energy volume versus what you still have to purchase for your profile

EV CHARGING
Future-proof your EV charging requirements with our world-leading networked technology

*According to our Energy Transparency Study, conducted by PwC, May 2016
