

**TotalEnergies**

**Managed Fully Flexible  
for Electricity Generation**

# Giving you total control

**The flexible power purchase  
agreement for the energy expert**

## How it works

Have the greatest flexibility and control to forward fix your electricity price up to the day ahead of delivery of the generation.

Any volume you haven't forward fixed will be priced on an agreed half hourly index basis.

## Benefits

Highest market risk means the greatest potential to achieve the best price for your generation.

Allows you to capitalise on your knowledge of the energy market and your generation profile.

“ ”

**I want to secure the best prices for my generation and don't mind taking on some risk to do this.**

## Key Features at a glance

Having a good grasp of your expected usage, you can freely hedge for the best prices for your generation.

Carry out transactions in HHs, days, weeks, months, quarters or seasons.

Any volume you have not forward fixed will be priced at an agreed index rate.

Manage your generation position through our online platform.

## Embedded Benefits

Generation assets have the advantage of having some non commodity costs that are usually charged to importers of electricity reversed, so they become a benefit to the generator.

## Commodity Costs

You can make forward transactions freely up to the day before delivery. Any difference in volume between your fixed position level and actual generation is settled on the within day market (System Price) or on an agreed index price.

**Excess / Shortfall Price**  
(SMP index)

**+**

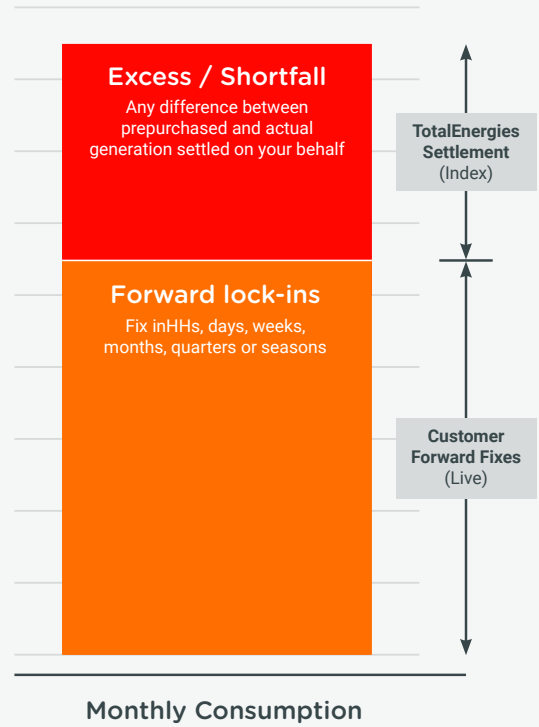

**Forward Price**  
(Live)

**=**

**Cost of electricity**  
(Average)

The cost of electricity is then applied to the whole of the actual generation.

 **In order to trade Days/HHs you must have access to the online platform.**

## Why TotalEnergies Gas & Power?

In addition to being one of the UK's largest energy suppliers and the most transparent in terms of pricing\*, we offer a range of valuable services, including:

### Green Energy

We can purchase green certificates produced alongside your generation to ensure you get the best value out of your asset.

### Market Reports

All the latest information on market conditions.

### EV Charging

Future-proof your EV charging requirements with our worldleading networked technology.
