

TotalEnergies

Managed Index for Electricity Generation

Giving you total ease

The flexible electricity product for the busy generator

How it works

Leave all your generation volume to go onto an index price.

It's straight-forward and easy to manage, and you will get an index price to match each half hour of your generation volume.

Benefits

There's no need to watch market prices constantly and make interventions to build up your generation price.

Have peace of mind that you're always getting market-reflective prices for all your generation volume.

“ ”

I just want minimal fuss - I'm happy to receive the latest market reflective price for any output from my generation plant.

Key Features at a glance

Receive the price from an agreed index for each half hour of generation output so you know it is market reflective.

The index is agreed at the start of your contract - you don't need to worry about setting the price from that point on.

No forward purchases required.

Why TotalEnergies Gas & Power?

In addition to being one of the UK's largest energy suppliers and the most transparent in terms of pricing*, we offer a range of valuable services, including:

Green Certificate Purchasing

We can purchase green certificates produced alongside your generation to ensure you get the best value out of your asset.

EV Charging

Future-proof your EV charging requirements with our world-leading networked technology.

*According to our Energy Transparency Study, conducted by PwC, May 2016
